

April 8, 2015

Spokane Clean Air is launching a new *Asbestos Updates* service for asbestos service providers, construction and demolition professionals, environmental safety managers, partner agencies and others. The Asbestos Updates service starts with a series of messages over the next three months about changes made to the **local asbestos regulations that took effect September 2, 2014, including:**

- ***Spokane Clean Air is enforcing the asbestos survey regulations that were in effect at the time an asbestos survey was performed.***
- For example, although asbestos sampling requirements in 40 CFR 763.86 required a minimum of two bulk samples for miscellaneous material sampling, Spokane Clean Air did not begin enforcing this requirement until it was clarified in the local regulations effective September 2, 2014.

Please feel free to forward this email to others in your organization and industry. Below are quick links you might find useful:

- Link to a short [Asbestos Service Providers survey](#), to ensure the Asbestos Updates service is providing key asbestos information that you want.
- [Summary](#) of the 2014 asbestos regulation changes.
- Complete [local asbestos regulations](#) and more.
- Spokane Clean Air with your comments or questions by emailing mchambers@spokanecleanair.org or by calling the office at (509) 477-4727.
