

INFO

Commercial / Industrial Boiler Service Providers

Spokane Regional Clean Air Agency (Spokane Clean Air) receives requests for referrals of companies that provide boiler services such as testing, tune-ups and repair. Below is a list Spokane Clean Air has compiled of regional service providers. It is up to each business to research a company's credentials before hiring them.

Spokane Clean Air does not recommend specific companies, whether they appear on this list or not. You may find additional companies and contact information in the boiler category in the Yellow Pages or by searching online. Additions to this document are made by request.
