FACILITY DESCRIPTION: Manufacturer of Fiberglass Loading Ramps

In a letter dated March 29, 2022, Melcher Manufacturing Co, Inc (Melcher) requested pursuant to WAC 173-400-091 to voluntarily limit its otherwise allowable emissions. The letter requested a facility-wide styrene emission limit of 9.5 tons during any consecutive 12-month period.

Effective {DRAFT – insert date}, Melcher Manufacturing shall comply with the following potential-to-emit limitations and conditions of approval:

1. Facility-wide emissions of styrene shall not exceed 9.5 tons during any consecutive 12 month period.

To ensure that the above emission limit is met, the facility shall comply with the following:

- A. Within 30 days after the end of each calendar month, Melcher shall calculate monthly styrene emissions for the previous month and total styrene emissions for the previous 12-month period. Emissions shall be calculated using the most recent Unified Emission Factors (UEF) for Open Molding and Other Composite Processes, Table 1: Unified Emission Factors for Open Modeling of Composites, Mechanical Non-Atomized and Gel Coat Application (given in Attachment A to Order #22-01). The UEF emission factor for each process at Melcher shall be multiplied by the amount of each styrene containing products used during the previous month in that process (e.g., gelcoats, resins, etc.). Emission calculation records shall be kept for a minimum of five years and made available to SRCAA upon request. Annual emissions shall be reported to SRCAA on annual registration forms provided by SRCAA.
- B. Emissions units and control equipment at Melcher must be operated as designed and kept in good operating condition.
- i) An operation and maintenance (O&M) plan is required for the emissions units and control equipment. The plan must include written operating instructions and maintenance schedules which follow manufacturer recommendations or good industrial practice. The plan must be provided to SRCAA upon request.
 - ii) Records demonstrating compliance with the O&M plan must be kept for the most recent twenty-four (24) months. Records must be provided to SRCAA upon request.
- C. A copy of this regulatory order shall be kept on site and made available to SRCAA personnel upon request.
- D. Upon issuance of Order #22-01, Melcher Manufacturing is reclassified as an area source of hazardous air pollutants under section 112(a) of the Clean Air Act and no longer subject to the requirements of 40 CFR 63, Subpart WWWW. Within 15 days of reclassification, Melcher is required to notify EPA of the reclassification, per the requirements of 40 CFR 63, Subpart 63.9.
- E. Upon issuance of Order #22-01, the Air Operating Permit issued by SRCAA to Melcher Manufacturing on January 29, 2018, AOP-15, is hereby voided and Melcher is no longer subject to the requirements of Chapter 173-401 WAC.
- F. The Control Officer, or duly authorized representative, shall be allowed to enter the facility premises at reasonable times to inspect equipment and/or records specific to the control, recovery, or release of contaminants into the atmosphere, in accordance with SRCAA Regulation I, Article II and RCW 70A.15.2500. For the purposes of this regulatory order, reasonable times include, but are not limited to, any of the following: normal business and/or equipment operating hours, periods of equipment breakdown or malfunction, and times when the Control Officer, or duly authorized representative are investigating air quality complaints filed with agency and/or have reason to believe that air quality violations have

occurred or may be occurring. No person shall obstruct, hamper or interfere with any such inspection.

- G. It is an ongoing condition of this regulatory order that the source be registered with the agency. Registration includes the following:
- i) Submittal of updated registration information at least annually as required by SRCAA, using forms provided by SRCAA. The forms provided by SRCAA shall be completed and returned to SRCAA within 45 days of issuance.
 - ii) Timely payment of annual registration fees to SRCAA in the amount required by SRCAA Regulations, as periodically amended. Failure to pay registration fees and other related fees within 120 days of the annual registration billing due date will result in an administrative closure of the facility. Re-opening will be governed by SRCAA Regulation I, Section 4.02.F.2, and may include resubmissions of a Notice of Construction and Application for Approval.

Any proposed deviation from this order shall require revision or revocation of this order. The revision or revocation shall occur prior to the deviation.

This order does not relieve the proponent of the obligation to comply with all other applicable federal, state and local regulations and requirements.

Authorization may be modified, suspended or revoked in whole or part for cause including, but not limited to, the following:

- Violation of any terms or conditions of this authorization; and/or
- Obtaining this authorization by misrepresentation or failure to disclose fully all relevant facts.

This order of approval may be appealed as described below:

Pursuant to the Revised Code of Washington (RCW) 43.21B.310, you have the right to appeal this Order by filing a notice of appeal with both the Pollution Control Hearings Board (PCHB) and the Spokane Regional Clean Air Agency (SRCAA) on or before the 30th day of receipt of SRCAA's order, permit, license, Notice and Order of Assessment of Civil Penalty, or Notice of Disposition.

Required procedures are detailed in state law (Chapter 43.21B RCW and Chapter 70A.15 RCW) and the PCHB's own regulations (Chapter 371.08 Washington Administrative Code) which may be found in many public libraries, county and municipal law libraries or on the Internet at www.access.wa.gov/. Since others publish these documents, copies are not available from SRCAA.

If you are filing an appeal, mail, deliver, or fax it to SRCAA and the PCHB at:
