## Supplemental Part B

### Storm or Flood Debris Burning (Regulation I, Article VI, Section 6.01.D.10)

A written permit is required for storm or flood debris burning. Storm or flood debris burning means fires consisting of natural vegetation deposited on lands by storms or floods that have occurred in the previous two years and resulted in an emergency being declared or proclaimed in the area by the city, county, or state government and burned on such lands by the property owner or his or her designee (RCW 70.94.743 (1)(c)). Burning is not allowed inside Urban Growth Areas, inside Spokane Regional Clean Air Agency’s No Burn Area, former nonattainment area, where reasonable alternatives exist, or where burning would likely cause smoke impacts to neighbors.

<b>Supplemental Part B must be completed and submitted with the permit application</b>		
Is the land outside Spokane Clean Air’s No Burn Area?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Is the land outside all Urban Growth Areas?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Is the land outside all former nonattainment areas?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Was the material deposited on the property as a result of a storm or flood within the last two (2) years?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Is documentation showing that the storm or flood resulted in an emergency being declared or proclaimed attached?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Does the material consist of natural vegetation only that is clean and free of soil and/or dirt?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Is the material smaller than 5 inches in diameter and is the pile free of stumps?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Is the burn pile(s) less than 10 feet in diameter?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Is burning likely to create a nuisance to neighbors?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Is smoke likely to impact roads, homes, or recreational areas?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
What is the proposed burn date?		
What is the parcel size for the proposed burn site?		
Estimate the total quantity of material to be burned.		

Do reasonable alternatives<sup>1</sup> exist instead of burning?

Yes

No

If no, explain in detail why burning is the only alternative.

---

<sup>1</sup>For burning organic refuse, a reasonable alternative is considered one where there is a method for disposing of the organic refuse at a cost that is less than or equivalent to the median of all county tipping fees in the state for disposal of municipal waste.
